

HISTORIC ENTRANCE TEST DATA

The following table gives data for entrance tests held since the current admissions criteria were adopted by the Governors. We would stress that achieving a score which has enabled an applicant to gain admission to the School in a previous year is no guarantee that a place will be offered, but we hope that the data will provide some useful guidance.

	Number Taking Entrance Test	Number Reaching Minimum Standard Required	Number of Applicants	Lowest Score Gaining Admission (excluding appeals)
September 2013 Admissions	1631	575	717	227
September 2014 Admissions	1985	718	830	223
September 2015 Admissions	1946	699	837	222
September 2016 Admissions	2204	770	869	226
September 2017 Admissions	2224	801	892	224
September 2018 Admissions	2401	861	933	229

Please note that the number of applicants exceeds the number reaching the minimum standard in each year because some candidates applied for admission despite not reaching the minimum score required. We would like to remind parents that under the terms of our admissions criteria, such candidates cannot be considered for admission to the School.
